

Job Description

Appointed Person – Lifting Engineer – Lift Supervisor

Location: Blyth, Northumberland, UK

As part of our ambitious growth plans, we are looking to recruit an Appointed Person to join us specializing in supporting our teams and our clients with large cargoes and complex projects. The role is to be responsible for the various lifting operations we perform from small mobiles through to crawlers, offshore cranes, and floating equipment.

The role is in a fast-growing business; it requires a person who has the drive to make a difference and the ambition to be part of our growth. As a core part of the team, you'll have different challenges throughout the day and opportunities to work in the UK and around the world. The role would suit a Lift supervisor with heavy lift experience and the ability to use AutoCAD or an engineer wanting a practical role.

What we expect from you:

The key responsibilities for an Appointed Person are:

- Attend sites to determine the best way to lift and shift complex cargo including installation, transport, and offshore work
- Determine innovative solutions to help our clients achieve their complex goals
- Be proactive and produce clear lift plans
- Able to manage a site of contractors to deliver complex multimodal operations from lifts to loadouts, transport and crane operations.
- Manage rigging loft lists and procure and replace equipment ensure inspections are performed in line with company procedures
- Keen to learn other aspects including barge operations, and seafastenings, to support the wider project.

What we offer in return:

In return, Harlyn can offer

- A diverse career working across a range of industries
- A challenge every day
- Independence and responsibility
- International travel opportunities
- Engineering and commercial training and development
- High energy environment
- Progression

Qualifications and experience

- Previous experience of performing heavy lifts
- Experience as an engineer of Crane Operator / Lift Supervisor
- Experience working on multiple projects at one time
- Strong organizational skills
- Drive to learn and make a difference
- Able to deal with multiple clients and projects simultaneously
- Innovative and proactive in nature
- Driving license
- Strong IT skills
