

Job Description

Harlyn Engineer

Location: Blyth, Northumberland, UK

Harlyn is on the lookout for our next engineers. Due to a growing number of project Harlyn are looking to add to our team. Harlyn offers a fast-paced and diverse career. We are specialising in taking our clients problems away from them and delivering logistical solutions across all forms of transportation and installation. We work across a range of industries including Oil & Gas, Renewables and Civil Construction. We are a young, dynamic company and this is a great chance to be part of a fast-growing team where you can make your mark.

What we expect from you:

The key responsibilities for a Harlyn Engineer are:

- To adapt, innovate and give 100% to help our clients deliver their project
- Design, price and executing innovative transportation schemes across a range of industries on and offshore
- Develop engineering documentation to justify our design
- Interact with our clients, understand their needs and drivers and deliver to their expectations
- Strong leadership and QHSE Drive

What we offer in return:

In return, Harlyn can offer:

- A diverse career working across a range of industries
- A challenge every day
- Independence and responsibility
- International travel opportunities
- Engineering and commercial training and development
- High energy environment
- Progression

Qualifications

- BEng Naval Architecture, Ship Science, Mechanical Engineering, Civil Engineering
- Understanding of one of our sectors
- Driving License
